CERTIFICATIONS

Java Programming
I have learnt basic concepts including Access specifiers, Arrays, OOPs concepts, functions, collection frameworks, Exception handling, Multi-threading.

Front End development–HTML5 & CSS3
I have learnt different tags and semantic elements that are used in HTML5 and properties of CSS that are used to create web pages.

Javascript

I've completed JavaScript course that equipped me with a solid understanding of foundational concepts.I've learned the basics of JavaScript, covering key concepts like variables, data types, control structures, and functions. My proficiency extends to arrays for data manipulation and objects for organized data and behavior. With skills in event handling, I'm excited to contribute to dynamic web projects.

Data Structure and Algorithm

I have learnt different data structures that are used for arranging data in different ways which includes Arrays, Lists, Sets.

EXPERIENCE - PERSONAL PROJECTS

- **Github Link for projects**
  https://github.com/abdullahkhan852

1.Personal Portfolio website -(05/2023)

This project was made using HTML,CSS and Javascript.

https://abdullahkhan852.github.io/akporfolio/

1. I have created Personal Portfolio website, which includes the technology of HTML5,CSS3 and JavaScript.
2. I have learnt how to implements different tags in HTML5 and how to use properties of CSS3. This project gives me an idea on how to create a website .

2.Irani Cafe Web-App   -(07/2023)

This project was made using HTML,CSS, JavaScript and PHP.

1. Irani Cafe Web-app allow customers with a convenient and hassle-free way to order food without visitng the cafe. This system offers a user-friendly interface, easy menu navigation, and seamless menu options for food and beverages to enhance the overall customer experience.
2. ·To drive additional sales and revenue for the cafe. By expanding the reach beyond the physical location and enabling customers to order remotely, cafes attracts new customers, encourage repeat business, and increase overall order volumes.
3. To reducing manual errors and optimizing operational efficiency.

3. Student Exam Management System -(02/2023)

This project was made using Java Swing, Java Database Connectivity (JDBC), Apache NetBeans Platform, Git version control .

1. It is a desktop application. that allows the user to give exam in an efficient manner conducted by the college / any organization.
2. It evaluates the exam appeared by the candidate through fully automated system and gives results immediately after the exam, it not only saves time but also gives fast results.
3. It can be used for educational purpose within institutions as well as for corporate world.
4. Also allows the admin to view all the database tables , he/she can add ,delete or update the questions also view the reults.
